## AnestasiA Vodka

We get it. There are lots and lots (and lots) of vodkas out there. This one is interesting because: 1) It comes in a kick-ass bottle -- from industrial designer Karim Rashid -- that will make everyone who sees it, ask about it; 2) It's gluten-free (made from corn), features water from Oregon's Cascade Mountains and undergoes five filtrations through volcanic rock, neutral charcoal and quartz crystal; and 3) It actually tastes good. Creamy and smooth, it will enhance anything from a vodka martini to a Moscow Mule.
